SPACE AND NAVAL WARFARE SYSTEMS CENTER (SPAWAR)

Barbaricum is a Service-Disabled Veteran-Owned Small Business (SDVOSB) providing full-scale Mission Support, Cyber Security/Intel, and Integrated Communication services. Barbaricum's marked success has positioned it as the fastest-growing company in its market. We possess an ISO 9001:2015-certified and CMMI Level 3-appraised Quality Management System (QMS) to deliver superior value to our clients. Our team's innovative and technical approach has resulted in over 50 prime contract awards supporting SOCOM, US Army Rapid Equipping Force (REF) U.S. Army Asymmetric Warfare Group (AWG), Veterans Affairs, and DoD's Office of the Inspector General (OIG). Barbaricum provides a suite of technology-enabled services—research, development, training, rapid acquisition and prototyping, validation and visualization, integration, and testing and evaluation—to address diverse technological needs. We are committed to providing solutions that work in permissive, uncertain, non-permissive or high-threat environments.

Barbaricum focuses on corporate culture as a cornerstone of the organization and was honored as one of *Inc. Magazine's* Best Workplaces for 2017. Barbaricum is affiliated with industry-leading organizations like the Global SOF Foundation, National Defense Industrial Association (NDIA), the Association of the United States Army (AUSA), and Iraq and Afghanistan Veterans of America (IAVA).

Space and Naval Warfare Systems Center (SPAWARSYSCEN) Atlantic is an Indefinite Delivery/Indefinite Quantity (IDIQ), multiple-award, performance-based type contract utilizing Firm-Fixed-Price delivery orders for Tagging, Tracking, and Locating (TTL) Equipment and Cost-Plus-Fixed-Fee/Firm-Fixed-Price task orders for support services.

SPAWAR manages a complex TTL mission requiring CONUS and OCONUS reliable support including rapid integration, test and evaluation, fielding, training, certification, maintenance, life-cycle sustainment, and field service technical support. Its Joint Warfare Support Division (JWSD) needs the best from industry to deliver engineering and technical services with efficient procurement capacity of all TTL related systems with significant experience across the CENTCOM AOR, especially Afghanistan. This mission requires highly specialized skill sets across a diverse team with years of experience supporting new technology deployments. Most operational requirements developed in Theater are time sensitive underscoring the importance of responsive proven support across Afghanistan. Optimal support of the current and future TTL infrastructure requires deep technical engineering expertise and innovation to exploit emerging technologies coming to market without bias. Barbaricum is a technology centric services company free from bias toward any particular system. Our agnostic approach ensures objective mission support to SPAWAR and SOCOM. We do not produce any hardware thereby avoiding conflicts of interest.

- Procures TTL equipment
- Provides rapid acquisition services
